JOURNAL OF PROPULSION AND POWER
Volume 18, No. 6, November–December 2002

2002 *Journal of Propulsion and Power* Index

How to Use the Index

In the Subject Index, pages 1313–1318, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, pages 1319 and 1320, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1321–1327, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the ISBN number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2002, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

B02-086 Aerodynamic Optimization of Turbomachinery Cascades Using Euler/Boundary-Layer Coupled Genetic Algorithms
B02-171 Effects of End Wall Geometry and Stacking on Supersonic Turbine Performance
B02-027 Equation for Additive Drag Coefficient at Static Conditions
B02-029 Optimal Three-Dimensinal Nozzle Shape Design Using CFD and Parallel Simulated Annealing
B02-012 Shock Fitting a Transonic Cascade Solution into an Inverse Design Technique
B02-066 Transonic Rotor Blade Pressure Measurement Using Flourescent Paints

Aeroelasticity and Aeroservoelasticity

B02-107 Computational-Fluid-Dynamics Investigation of Aeromechanics

Noise

B02-096 High-Intensity Sound Absorption at an Orifice with Bias Flow

Powerplant Integration

B02-075 High-Pressure Steam Flow in Turbine Bypass Valve System Part 1: Valve Flow

Safety

B02-038 Leak Fault Detection of Liquid Rocket Engine Based on Strong Tracking Filter

Simulation

B02-038 Leak Fault Detection of Liquid Rocket Engine Based on Strong Tracking Filter

STOL/VTOL/STOVL

B02-094 Geometric Evaluation of Axisymmetric Thrust-Vectoring Nozzles for Aerodynamic Performance Predictions

Energy

Alternate Fuels

B02-110 Asphaltic Thermoplastic Propellants

Fuel Cells

B02-064 Recent GRC Aerospace Technologies Applicable to Terrestrial Energy Systems

Fuel Economy

B02-032 Development of Advanced Industrial Furnace Using Highly Preheated Combustion Air

Magnetohydrodynamic Power Generation

B02-057 Magnetohydrodynamic Power Extraction from Cold Hypersonic Airflows with External Ionizers

Nuclear Fission

B02-068 Project Orion and Future Prospects for Nuclear Pulse Propulsion

Reciprocating Machinery

B02-044 Slingatron: A High Velocity Rapid Fire Sling

Rotating Machinery

B02-011 Active Control of Discrete-Frequency Noise Generated by Rotor-Stator Interactions
B02-074 Development of High-Performance Airfoils for Axial Flow Compressors Using Evolutionary Computation
B02-147 Experimental Investigation of End-Wall Flow in Turbine Rotor
B02-046 Numerical Simulations of the Slingatron
B02-044 Slingatron: A High Velocity Rapid Fire Sling
B02-069 Study of the Phase-Lock Phenomenon for a Circular Slingatron

Solar Power

B02-153 Mass-Based Optimization of Thermal Management and Power Systems for Space Applications

Stirling Engine

B02-092 Experimental Study of a 3-kW Stirling Engine
B02-064 Recent GRC Aerospace Technologies Applicable to Terrestrial Energy Systems

Thermoelectric

B02-031 Multilevel Analysis of Pulsed Detonation Engines

Fluid Dynamics

Aeroacoustics

B02-011 Active Control of Discrete-Frequency Noise Generated by Rotor-Stator Interactions
B02-042 Effect of Nozzle Cavity on Resonance in Large SRM: Theoretical Modeling
B02-006 Experimental Investigation of Limit-Cycle Oscillations in an Unstable Gas Turbine Combustor
B02-096 High-Intensity Sound Absorption at an Orifice with Bias Flow

Boundary Layers and Heat Transfer—Laminar

B02-119 Control of Low-Pressure Turbine Separation Using Vortex-Generator Jets

B02-031 Multilevel Analysis of Pulsed Detonation Engines

Boundary Layers and Heat Transfer—Turbulent

B02-031 Multilevel Analysis of Pulsed Detonation Engines
B02-041 Numerical Predictions of Channel Flows with Fluid Injection Using Reynolds-Stress Model
B02-081 Solid-Fuel Regression Rate Behavior of Vortex Hybrid Rocket Engines

Boundary-Layer Stability and Transition

B02-041 Numerical Predictions of Channel Flows with Fluid Injection Using Reynolds-Stress Model

Computational Fluid Dynamics

B02-086 Aerodynamic Optimization of Turbomachinery Cascades Using Euler/Boundary-Layer Coupled Genetic Algorithms
B02-151 Analysis and Application of Chorochronic Periodicity in Turbomachinery Rotor/Stator Interaction Computations
B02-122 Automated Design Optimization of a Three-Dimensional S-Shaped Subsonic Diffuser
B02-040 Characteristic Analysis of Flow-Induced Vibrations on Inducer of Oxygen Pump
B02-107 Computational-Fluid-Dynamics Investigation of Aeromechanics
B02-074 Development of High-Performance Airfoils for Axial Flow Compressors Using Evolutionary Computation
B02-171 Effects of End Wall Geometry and Stacking on Supersonic Turbine Performance
B02-002 Integrated Design and Analysis of Intakes and Nozzles in Air-Breathing Engines
B02-052 Linear Deterministic Source Terms for Hot Streak Simulations
B02-161 Modeling Cavitating Venturi Flows
B02-072 Multiobjective Optimization of Rocket Engine Pumps Using Evolutionary Algorithm
B02-157 Numerical Reconstruction of Ejector Rocket Experimental Tests
B02-004 Numerical Simulation of the Ram Accelerator Using a New Chemical Kinetics Mechanism
B02-029 Optimal Three-Dimensinal Nozzle Shape Design Using CFD and Parallel Simulated Annealing
B02-079 Performance Analysis of Secondary Gas Injection into a Conical Rocket Nozzle
B02-012 Shock Fitting a Transonic Cascade Solution into an Inverse Design Technique
B02-067 Unsteady Flow in a Supersonic Turbine with Variable Specific Heats

Hydrodynamics

B02-161 Modeling Cavitating Venturi Flows
B02-137 Numerical Simulation of a Pulse Detonation Engine with Hydrogen Fuels

Hypersonic Flow

B02-138 Influence of Radical Concentration and Fuel Decomposition on Ignition of Propane/Air Mixture

Inlet, Nozzle, Diffuser, and Channel Flows

B02-078 Appearance of Restricted Shock Separation in Rocket Nozzles
B02-122 Automated Design Optimization of a Three-Dimensional S-Shaped Subsonic Diffuser
B02-035 Computations of Axisymmetric Plug-Nozzle Flowfields: Flow Structures and Thrust Performance
B02-135 Effect of Integration of Scramjet into Airframe on Engine Performance and Payload
B02-094 Geometric Evaluation of Axisymmetric Thrust-Vectoring Nozzles for Aerodynamic Performance Predictions
B02-093 Improved Mean-Flow Solution for Slab Rocket Motors with Regressing Walls
B02-002 Integrated Design and Analysis of Intakes and Nozzles in Air-Breathing Engines
B02-158 Motor and Plume Particle Size Prediction in Solid-Propellant Rocket Motors
B02-036 Numerical Simulation of Side Loads in an Ideal Truncated Nozzle
B02-029 Optimal Three-Dimensinal Nozzle Shape Design Using CFD and Parallel Simulated Annealing
B02-079 Performance Analysis of Secondary Gas Injection into a Conical Rocket Nozzle
B02-146 Study of Flow Separation in Truncated Ideal Contour Nozzle

Jets, Wakes, and Viscid-Inviscid Flow Interactions

B02-108 Facility Effects on Performance Measurements of Micropropulsion Systems that Utilize Gas Expansion
B02-010 Flow Control via Rotor Trailing Edge Blowing in a Rotor/Stator Axial Compressor
B02-079 Performance Analysis of Secondary Gas Injection into a Conical Rocket Nozzle

Multiphase Flows

B02-022 Flow Past Stationary Spherical Particles with Streamwise Velocity Fluctuation
B02-161 Modeling Cavitating Venturi Flows
B02-137 Numerical Simulation of a Pulse Detonation Engine with Hydrogen Fuels
B02-030 Propagation of Acoustic Waves in a Two-Phase Vaporizing Mixture

Plasmadynamics and MHD

B02-150 Advanced Performance Modeling of Experimental Laser Lightcraft
B02-017 Design of a Fusion Propulsion System—Part 1: Gigawatt-Level Magnetoplasmadynamic Source
B02-028 Intercusp Electron Transport in an NSTAR-Derivative Ion Thruster
B02-019 Interior and Exterior Laser-Induced Flourescence and Plasma Measurements within a Hall Thruster
B02-057 Magnetohydrodynamic Power Extraction from Cold Hypersonic Airflows with External Ionizers

Rarefied Flows

B02-108 Facility Effects on Performance Measurements of Micropropulsion Systems that Utilize Gas Expansion

Reacting Flows and Combustion

B02-095 Combustion Characteristics of Ethylene in Scramjet Engines
B02-053 Combustion Instability Active Control Using Periodic Fuel Injection
B02-139 Effects of Halons and Halon Replacements on Hydrogen-Fueled Laminar Premixed Flames
B02-137 Numerical Simulation of a Pulse Detonation Engine with Hydrogen Fuels
B02-004 Numerical Simulation of the Ram Accelerator Using a New Chemical Kinetics Mechanism
B02-023 Reduced Chemical Kinetic Mechanisms for Hydrocarbon Fuels
B02-169 Interaction of Decaying Freestream Turbulence with a Moving Shock Wave: Pressure Field
B02-163 Thermochemistry of Species Produced from Monomethylhydrazine in Propulsion and Space-Related Applications
B02-087 When Do Open-Loop Strategies for Combustion Control Work?

Separated Flows

B02-078 Appearance of Restricted Shock Separation in Rocket Nozzles
B02-119 Control of Low-Pressure Turbine Separation Using Vortex-Generator Jets
B02-036 Numerical Simulation of Side Loads in an Ideal Truncated Nozzle
B02-146 Study of Flow Separation in Truncated Ideal Contour Nozzle

Shock Waves and Detonations

B02-169 Interaction of Decaying Freestream Turbulence with a Moving Shock Wave: Pressure Field

Subsonic Flow

B02-122 Automated Design Optimization of a Three-Dimensional S-Shaped Subsonic Diffuser

Transonic Flow

B02-129 A PIV Investigation of Rotor-IGV Interactions in a Transonic Compressor
B02-066 Transonic Rotor Blade Pressure Measurement Using Flourescent Paints

Unsteady Flows

B02-129 A PIV Investigation of Rotor-IGV Interactions in a Transonic Compressor
B02-011 Active Control of Discrete-Frequency Noise Generated by Rotor-Stator Interactions
B02-168 Airfoil Row/Wake Interactions in a High-Speed Axial Compressor
B02-151 Analysis and Application of Chorochronic Periodicity in Turbomachinery Rotor/Stator Interaction Computations
B02-107 Computational-Fluid-Dynamics Investigation of Aeromechanics
B02-171 Effects of End Wall Geometry and Stacking on Supersonic Turbine Performance
B02-006 Experimental Investigation of Limit-Cycle Oscillations in an Unstable Gas Turbine Combustor
B02-022 Flow Past Stationary Spherical Particles with Streamwise Velocity Fluctuation
B02-133 High-Speed Centrifugal Compressor Surge Initiation Characterization
B02-093 Improved Mean-Flow Solution for Slab Rocket Motors with Regressing Walls
B02-062 Massively Parallel Simulation of the Unsteady Flow in an Axial Turbine Stage
B02-166 Measured Flow Oscillations and Instabilities in Labyrinth Seal Cavities
B02-036 Numerical Simulation of Side Loads in an Ideal Truncated Nozzle
B02-060 Particle Image Velocimetry Characterization of a Chordwise Bending Cascade Flowfield
B02-061 Rotor Blade-to-Blade Wake Variability and Effect on Downstream Vane Response

B02-146 Study of Flow Separation in Truncated Ideal Contour Nozzle
B02-169 Interaction of Decaying Freestream Turbulence with a Moving Shock Wave: Pressure Field
B02-071 Unsteady Cascade Aerodynamics in the Time Domain
B02-067 Unsteady Flow in a Supersonic Turbine with Variable Specific Heats

Viscous Non-Boundary-Layer Flows

B02-022 Flow Past Stationary Spherical Particles with Streamwise Velocity Fluctuation
B02-093 Improved Mean-Flow Solution for Slab Rocket Motors with Regressing Walls

Vortices

B02-147 Experimental Investigation of End-Wall Flow in Turbine Rotor
B02-096 High-Intensity Sound Absorption at an Orifice with Bias Flow

Guidance, Control, and Dynamics Technology

Artificial Intelligence

B02-059 Fuzzy Logic Intelligent System for Gas Turbine Module and System Fault Isolation

Control System Design

B02-053 Combustion Instability Active Control Using Periodic Fuel Injection
B02-087 When Do Open-Loop Strategies for Combustion Control Work?

Dynamics

B02-069 Study of the Phase-Lock Phenomenon for a Circular Slingatron

Engine Control

B02-053 Combustion Instability Active Control Using Periodic Fuel Injection
B02-087 When Do Open-Loop Strategies for Combustion Control Work?

Launch Vehicle Dynamics

B02-045 Sizing a Slingatron-Based Space Launcher

Interdisciplinary Topics

Analytical and Numerical Methods

B02-080 Ejector Primary Flow Molecular Weight Effects in an Ejector-Ram Rocket Engine
B02-069 Study of the Phase-Lock Phenomenon for a Circular Slingatron

Atmospheric and Space Sciences

B02-163 Thermochemistry of Species Produced from Monomethylhydrazine in Propulsion and Space-Related Applications

Lasers and Laser Applications

B02-124 Analysis of a Fusion-Electric Air-breathing Earth to Orbit Launch Vehicle
B02-065 Correlating Laser Induced Fluorescence and Molecular Beam Mass Spectrometry Ion Energy Distributions
B02-019 Interior and Exterior Laser-Induced Flourescence and Plasma Measurements within a Hall Thruster
B02-127 Laser-Air Interactions in an Internal Supersonic Flowpath

Multidisciplinary Design Optimization

B02-121 Optimum Mixing of Core and Bypass Streams in a High-Bypass Civil Turbofan

Safety

B02-116 Heat Release Rates of Burning Items in Fires

Launch Vehicle and Missile (LV/M) Technology

Launch Vehicle and Sounding Rocket Systems

B02-124 Analysis of a Fusion-Electric Air-breathing Earth to Orbit Launch Vehicle
B02-127 Laser-Air Interactions in an Internal Supersonic Flowpath

Propulsion and Propellant Systems

B02-162 Hydrogen Peroxide Decomposition on Various Supported Catalysts Effect of Stabilizers
B02-150 Advanced Performance Modeling of Experimental Laser Lightcraft
B02-082 Combustion of Liquefying Hybrid Propellants: Part 1, General Theory
B02-083 Combustion of Liquefying Hybrid Propellants: Part 2, Stability of Liquid Films
B02-101 Effect of ESEX 26-kW Arcjet Operation on Spacecraft Communications
B02-104 Mass Deposition Measurements from 26-Kilowatt Electric Propulsion Space Experiment Flight
B02-158 Motor and Plume Particle Size Prediction in Solid-Propellant Rocket Motors
B02-046 Numerical Simulations of the Slingatron
B02-097 Review of the Electric Propulsion Space Experiment (ESEX) Program
B02-070 Shape Optimization of Supersonic Turbines Using Global Approximation Methods

Testing, Flight and Ground

B02-077 Acceptance Screening of Turbopump Gears Using the Cepstrum Method
B02-097 Review of the Electric Propulsion Space Experiment (ESEX) Program

Vibration

B02-040 Characteristic Analysis of Flow-Induced Vibrations on Inducer of Oxygen Pump

Propulsion

Advanced Space Propulsion

B02-141 Assessment of Combustion Characteristics and Mechanism of Hydroxylammonium Nitrate-Based Liquid Monopropellant
B02-035 Computations of Axisymmetric Plug-Nozzle Flowfields: Flow Structures and Thrust Performance
B02-017 Design of a Fusion Propulsion System—Part 1: Gigawatt-Level Magnetoplasmadynamic Source
B02-018 Design of a Fusion Propulsion System—Part 2: Numerical Simulation of Magnetic-Nozzle Flows
B02-080 Ejector Primary Flow Molecular Weight Effects in an Ejector-Ram Rocket Engine
B02-046 Numerical Simulations of the Slingatron
B02-015 Overview of the Development of Hydrazinium Nitroformate
B02-016 Overview of the Development of Hydrazinium Nitroformate-Based Propellants
B02-068 Project Orion and Future Prospects for Nuclear Pulse Propulsion
B02-045 Sizing a Slingatron-Based Space Launcher
B02-044 Slingatron: A High Velocity Rapid Fire Sling
B02-067 Unsteady Flow in a Supersonic Turbine with Variable Specific Heats

Airbreathing Propulsion

B02-129 A PIV Investigation of Rotor-IGV Interactions in a Transonic Compressor
B02-086 Aerodynamic Optimization of Turbomachinery Cascades Using Euler/Boundary-Layer Coupled Genetic Algorithms
B02-168 Airfoil Row/Wake Interactions in a High-Speed Axial Compressor
B02-151 Analysis and Application of Chorochronic Periodicity in Turbomachinery Rotor/Stator Interaction Computations
B02-124 Analysis of a Fusion-Electric Air-breathing Earth to Orbit Launch Vehicle
B02-051 Chemiluminescence-Based Feedback Control of Equivalence Ratio for a Continuous Combustor
B02-055 Combustion Air Jet Influence on Primary Zone Characteristics for Gas-Turbine Combustors
B02-126 Drag and Total Pressure Distributions in Scramjet Engines at Mach 8 Flight
B02-135 Effect of Integration of Scramjet into Airframe on Engine Performance and Payload
B02-008 Fundamentals of Idealized Airbreathing Pulse-Detonation Engines
B02-133 High-Speed Centrifugal Compressor Surge Initiation Characterization
B02-063 Impeller Blade Unsteady Aerodynamic Response to Vaned Diffuser Potential Fields
B02-138 Influence of Radical Concentration and Fuel Decomposition on Ignition of Propane/Air Mixture
B02-123 Inlet/Compressor System Response to Short-Duration Acoustic Disturbances
B02-002 Integrated Design and Analysis of Intakes and Nozzles in Air-Breathing Engines
B02-127 Laser-Air Interactions in an Internal Supersonic Flowpath
B02-052 Linear Deterministic Source Terms for Hot Streak Simulations
B02-056 Mach 8 Testing of a Scramjet Engine with Ramp Compression
B02-062 Massively Parallel Simulation of the Unsteady Flow in an Axial Turbine Stage
B02-157 Numerical Reconstruction of Ejector Rocket Experimental Tests
B02-121 Optimum Mixing of Core and Bypass Streams in a High-Bypass Civil Turbofan
B02-060 Particle Image Velocimetry Characterization of a Chordwise Bending Cascade Flowfield
B02-061 Rotor Blade-to-Blade Wake Variability and Effect on Downstream Vane Response
B02-012 Shock Fitting a Transonic Cascade Solution into an Inverse Design Technique
B02-049 Study of the High-Temperature Autoignition of n-Alkane/O_2/Ar Mixtures

B02-149 Supersonic Wave/Blade-Row Interactions Establish Boundary Conditions for Unsteady Inlet Flows
B02-154 Thermodynamics of Airbreathing Pulse-Detonation Engines
B02-007 Thermodynamic Cycle Analysis of Pulse Detonation Engines
B02-128 Timescaling Control Volumes During Real Time Digital Simulation of a Military Turbofan
B02-024 Two-Dimensional Spectroscopic Analysis of a Flame Using Highly Preheated Combustion Air
B02-071 Unsteady Cascade Aerodynamics in the Time Domain
B02-156 Work Potential Perspective of Engine Component Performance

Combustion and Combustor Designs

B02-025 Anomalous Deflagration Behavior of Ammonium Perchlorate at Elevated Pressures
B02-084 Burning Aluminum Particles Inside a Laboratory-Scale Solid Rocket Motor
B02-112 Chemical Speciation and Dynamics in the Surface Combustion Zone of Energetic Materials
B02-055 Combustion Air Jet Influence on Primary Zone Characteristics for Gas-Turbine Combustors
B02-082 Combustion of Liquefying Hybrid Propellants: Part 1, General Theory
B02-083 Combustion of Liquefying Hybrid Propellants: Part 2, Stability of Liquid Films
B02-032 Development of Advanced Industrial Furnace Using Highly Preheated Combustion Air
B02-091 Elliptic Coflow Effects on a Circular Gas Jet Flame
B02-116 Heat Release Rates of Burning Items in Fires
B02-111 Model of Aluminum Agglomerate Evolution in Combustion Products of Solid Rocket Propellant
B02-106 Observations of Soot in the Combustion of Methanol/Toluene Spray Flames
B02-140 Pilot Flame Effects on Gas Jet Flames in Crossflow
B02-023 Reduced Chemical Kinetic Mechanisms for Hydrocarbon Fuels
B02-024 Two-Dimensional Spectroscopic Analysis of a Flame Using Highly Preheated Combustion Air

Combustion Instability

B02-043 Dynamic Combustion of Solid Propellants: Effects of Unsteady Condensed Phase Degradation Layer
B02-014 Effects of Grain Geometry on Pulse-Triggered Combustion Instability in Rocket Motors
B02-085 Evaluation of Ultrasound Technique for Solid-Propellant Burning-Rate Response Measurements
B02-030 Propagation of Acoustic Waves in a Two-Phase Vaporizing Mixture

Detonation

B02-136 Direct Experimental Impulse Measurements for Detonations and Deflagrations
B02-043 Dynamic Combustion of Solid Propellants: Effects of Unsteady Condensed Phase Degradation Layer
B02-047 Ethylene Ignition and Detonation Chemistry, Part 1: Detailed Modeling and Experimental Comparison
B02-048 Ethylene Ignition and Detonation Chemistry, Part 2: Ignition Histories and Reduced Mechanisms
B02-008 Fundamentals of Idealized Airbreathing Pulse-Detonation Engines
B02-007 Thermodynamic Cycle Analysis of Pulse Detonation Engines
B02-154 Thermodynamics of Airbreathing Pulse-Detonation Engines

Droplet and Spray Characterization

B02-026 Effects of GH_2/LOX Velocity and Momentum Ratios on Shear Coaxial Injector Atomization
B02-033 Effects of Liquid-Oxygen Post Biasing on SSME Injector Wall Compatibility
B02-111 Model of Aluminum Agglomerate Evolution in Combustion Products of Solid Rocket Propellant
B02-106 Observations of Soot in the Combustion of Methanol/Toluene Spray Flames

Electric Propulsion

B02-021 Cascade Arc Studies of Hydrogen/Nitrogen Plasmas in Nonequilibrium
B02-172 Controlling Electron Backstreaming Phenomena Through the Use of a Transverse Magnetic Field
B02-065 Correlating Laser Induced Fluorescence and Molecular Beam Mass Spectrometry Ion Energy Distributions
B02-099 Development and Flight Qualification of a 26-Kilowatt Arcjet Propulsion Subsystem
B02-101 Effect of ESEX 26-kW Arcjet Operation on Spacecraft Communications
B02-108 Facility Effects on Performance Measurements of Micropropulsion Systems that Utilize Gas Expansion
B02-028 Intercusp Electron Transport in an NSTAR-Derivative Ion Thruster
B02-019 Interior and Exterior Laser-Induced Flourescence and Plasma Measurements within a Hall Thruster
B02-104 Mass Deposition Measurements from 26-Kilowatt Electric Propulsion Space Experiment Flight
B02-097 Review of the Electric Propulsion Space Experiment (ESEX) Program
B02-103 Solar Cell Degradation During the 26-Kilowatt Electric Propulsion Space Experiment Flight
B02-098 System Engineering, Design, Integration, and Qualification of Electric Propulsion Space Experiment
B02-020 Verification Tests of Carbon-Carbon Composite Grids for Microwave Discharge Ion Thruster

Emissions and Noises

B02-055 Combustion Air Jet Influence on Primary Zone Characteristics for Gas-Turbine Combustors
B02-032 Development of Advanced Industrial Furnace Using Highly Preheated Combustion Air
B02-091 Elliptic Coflow Effects on a Circular Gas Jet Flame
B02-106 Observations of Soot in the Combustion of Methanol/Toluene Spray Flames
B02-140 Pilot Flame Effects on Gas Jet Flames in Crossflow
B02-050 Profiling of Redox Index During Combustion to Monitor C/C Composite Degradation in Flames

Engine Control Integration and Health Monitoring

B02-077 Acceptance Screening of Turbopump Gears Using the Cepstrum Method
B02-134 Gas Turbine Engine and Sensor Fault Diagnosis Using Optimization Techniques

Engine Cooling and Heat Transfer

B02-033 Effects of Liquid-Oxygen Post Biasing on SSME Injector Wall Compatibility

Engine Performance

B02-156 Work Potential Perspective of Engine Component Performance
B02-035 Computations of Axisymmetric Plug-Nozzle Flowfields: Flow Structures and Thrust Performance
B02-054 Constant Volume Limit of Pulsed Propulsion for a Constant γ Ideal Gas
B02-018 Design of a Fusion Propulsion System—Part 2: Numerical Simulation of Magnetic-Nozzle Flows
B02-126 Drag and Total Pressure Distributions in Scramjet Engines at Mach 8 Flight
B02-080 Ejector Primary Flow Molecular Weight Effects in an Ejector-Ram Rocket Engine
B02-008 Fundamentals of Idealized Airbreathing Pulse-Detonation Engines
B02-133 High-Speed Centrifugal Compressor Surge Initiation Characterization
B02-166 Measured Flow Oscillations and Instabilities in Labyrinth Seal Cavities
B02-121 Optimum Mixing of Core and Bypass Streams in a High-Bypass Civil Turbofan
B02-050 Profiling of Redox Index During Combustion to Monitor C/C Composite Degradation in Flames
B02-154 Thermodynamics of Airbreathing Pulse-Detonation Engines
B02-007 Thermodynamic Cycle Analysis of Pulse Detonation Engines
B02-128 Timescaling Control Volumes During Real Time Digital Simulation of a Military Turbofan

Fuels and Propellants, Properties of

B02-025 Anomalous Deflagration Behavior of Ammonium Perchlorate at Elevated Pressures
B02-110 Asphaltic Thermoplastic Propellants
B02-141 Assessment of Combustion Characteristics and Mechanism of Hydroxylammonium Nitrate-Based Liquid Monopropellant

B02-112 Chemical Speciation and Dynamics in the Surface Combustion Zone of Energetic Materials
B02-116 Heat Release Rates of Burning Items in Fires
B02-145 High Strain-Rate Constitutive Models for Solid Rocket Propellants
B02-015 Overview of the Development of Hydrazinium Nitroformate
B02-016 Overview of the Development of Hydrazinium Nitroformate-Based Propellants
B02-050 Profiling of Redox Index During Combustion to Monitor C/C Composite Degradation in Flames
B02-109 Sensitivity of Solid Rocket Motors to Electrostatic Discharge: History and Future
B02-049 Study of the High-Temperature Autoignition of *n*-Alkane/O_2/Ar Mixtures
B02-163 Thermochemistry of Species Produced from Monomethylhydrazine in Propulsion and Space-Related Applications
B02-034 Time- and Length Scales of Combustion in Liquid Rocket Thrust Chambers
B02-024 Two-Dimensional Spectroscopic Analysis of a Flame Using Highly Preheated Combustion Air

Gas Turbine Engines

B02-164 Advanced Seals for Industrial Turbine Applications: Design Approach and Static Seal Development
B02-165 Advanced Seals for Industrial Turbine Applications: Dynamic Seal Development
B02-168 Airfoil Row/Wake Interactions in a High-Speed Axial Compressor
B02-051 Chemiluminescence-Based Feedback Control of Equivalence Ratio for a Continuous Combustor
B02-006 Experimental Investigation of Limit-Cycle Oscillations in an Unstable Gas Turbine Combustor
B02-059 Fuzzy Logic Intelligent System for Gas Turbine Module and System Fault Isolation
B02-134 Gas Turbine Engine and Sensor Fault Diagnosis Using Optimization Techniques
B02-094 Geometric Evaluation of Axisymmetric Thrust-Vectoring Nozzles for Aerodynamic Performance Predictions
B02-063 Impeller Blade Unsteady Aerodynamic Response to Vaned Diffuser Potential Fields
B02-061 Rotor Blade-to-Blade Wake Variability and Effect on Downstream Vane Response
B02-073 Three-Dimensional Hybrid Mesh Generation for Turbomachinery Airfoils
B02-156 Work Potential Perspective of Engine Component Performance

Hypersonic Propulsion

B02-095 Combustion Characteristics of Ethylene in Scramjet Engines
B02-138 Influence of Radical Concentration and Fuel Decomposition on Ignition of Propane/Air Mixture
B02-057 Magnetohydrodynamic Power Extraction from Cold Hypersonic Airflows with External Ionizers

Hybrid Rocket Engines

B02-082 Combustion of Liquefying Hybrid Propellants: Part 1, General Theory
B02-083 Combustion of Liquefying Hybrid Propellants: Part 2, Stability of Liquid Films
B02-059 Fuzzy Logic Intelligent System for Gas Turbine Module and System Fault Isolation
B02-081 Solid-Fuel Regression Rate Behavior of Vortex Hybrid Rocket Engines

Ignition and Ignitor Design

B02-162 Hydrogen Peroxide Decomposition on Various Supported Catalysts Effect of Stabilizers
B02-084 Burning Aluminum Particles Inside a Laboratory-Scale Solid Rocket Motor
B02-090 Effects of Airstream Mach Number on H_2/N_2 Plasma Igniter
B02-014 Effects of Grain Geometry on Pulse-Triggered Combustion Instability in Rocket Motors
B02-047 Ethylene Ignition and Detonation Chemistry, Part 1: Detailed Modeling and Experimental Comparison
B02-048 Ethylene Ignition and Detonation Chemistry, Part 2: Ignition Histories and Reduced Mechanisms
B02-049 Study of the High-Temperature Autoignition of *n*-Alkane/O_2/Ar Mixtures
B02-034 Time- and Length Scales of Combustion in Liquid Rocket Thrust Chambers

Liquid Rocket Motors and Missile Systems

B02-077 Acceptance Screening of Turbopump Gears Using the Cepstrum Method
B02-162 Hydrogen Peroxide Decomposition on Various Supported Catalysts Effect of Stabilizers
B02-078 Appearance of Restricted Shock Separation in Rocket Nozzles
B02-037 Design Analysis of a Satellite Hydrazine Propulsion System
B02-026 Effects of GH_2/LOX Velocity and Momentum Ratios on Shear Coaxial Injector Atomization
B02-033 Effects of Liquid-Oxygen Post Biasing on SSME Injector Wall Compatibility
B02-072 Multiobjective Optimization of Rocket Engine Pumps Using Evolutionary Algorithm
B02-039 Temperature-Dependent Modal Test/Analysis Correlation of X-34 FASTRAC Composite Rocket Nozzle
B02-034 Time- and Length Scales of Combustion in Liquid Rocket Thrust Chambers

Propulsion Hazards

B02-018 Design of a Fusion Propulsion System—Part 2: Numerical Simulation of Magnetic-Nozzle Flows
B02-109 Sensitivity of Solid Rocket Motors to Electrostatic Discharge: History and Future

Ramjets and Scramjets

B02-126 Drag and Total Pressure Distributions in Scramjet Engines at Mach 8 Flight
B02-135 Effect of Integration of Scramjet into Airframe on Engine Performance and Payload
B02-090 Effects of Airstream Mach Number on H_2/N_2 Plasma Igniter
B02-056 Mach 8 Testing of a Scramjet Engine with Ramp Compression
B02-004 Numerical Simulation of the Ram Accelerator Using a New Chemical Kinetics Mechanism

Solid Rocket Motors and Missile Systems

B02-025 Anomalous Deflagration Behavior of Ammonium Perchlorate at Elevated Pressures
B02-110 Asphaltic Thermoplastic Propellants
B02-084 Burning Aluminum Particles Inside a Laboratory-Scale Solid Rocket Motor
B02-043 Dynamic Combustion of Solid Propellants: Effects of Unsteady Condensed Phase Degradation Layer
B02-042 Effect of Nozzle Cavity on Resonance in Large SRM: Theoretical Modeling
B02-014 Effects of Grain Geometry on Pulse-Triggered Combustion Instability in Rocket Motors
B02-085 Evaluation of Ultrasound Technique for Solid-Propellant Burning-Rate Response Measurements
B02-145 High Strain-Rate Constitutive Models for Solid Rocket Propellants
B02-111 Model of Aluminum Agglomerate Evolution in Combustion Products of Solid Rocket Propellant
B02-158 Motor and Plume Particle Size Prediction in Solid-Propellant Rocket Motors
B02-041 Numerical Predictions of Channel Flows with Fluid Injection Using Reynolds-Stress Model
B02-015 Overview of the Development of Hydrazinium Nitroformate
B02-016 Overview of the Development of Hydrazinium Nitroformate-Based Propellants
B02-144 Property Transformation of Thermotropic Liquid Crystals Polymers
B02-109 Sensitivity of Solid Rocket Motors to Electrostatic Discharge: History and Future

Supersonic Combustion

B02-090 Effects of Airstream Mach Number on H_2/N_2 Plasma Igniter
B02-056 Mach 8 Testing of a Scramjet Engine with Ramp Compression

Transient Combustion and Detonation

B02-054 Constant Volume Limit of Pulsed Propulsion for a Constant Y Ideal Gas
B02-043 Dynamic Combustion of Solid Propellants: Effects of Unsteady Condensed Phase Degradation Layer
B02-085 Evaluation of Ultrasound Technique for Solid-Propellant Burning-Rate Response Measurements

Turbomachinery

B02-164 Advanced Seals for Industrial Turbine Applications: Design Approach and Static Seal Development
B02-165 Advanced Seals for Industrial Turbine Applications: Dynamic Seal Development
B02-119 Control of Low-Pressure Turbine Separation Using Vortex-Generator Jets
B02-074 Development of High-Performance Airfoils for Axial Flow Compressors Using Evolutionary Computation
B02-147 Experimental Investigation of End-Wall Flow in Turbine Rotor
B02-010 Flow Control via Rotor Trailing Edge Blowing in a Rotor/Stator Axial Compressor
B02-063 Impeller Blade Unsteady Aerodynamic Response to Vaned Diffuser Potential Fields
B02-062 Massively Parallel Simulation of the Unsteady Flow in an Axial Turbine Stage
B02-166 Measured Flow Oscillations and Instabilities in Labyrinth Seal Cavities

B02-072 Multiobjective Optimization of Rocket Engine Pumps Using Evolutionary Algorithm
B02-070 Shape Optimization of Supersonic Turbines Using Global Approximation Methods
B02-149 Supersonic Wave/Blade-Row Interactions Establish Boundary Conditions for Unsteady Inlet Flows
B02-073 Three-Dimensional Hybrid Mesh Generation for Turbomachinery Airfoils

Space Technology

Space Experiments

B02-101 Effect of ESEX 26-kW Arcjet Operation on Spacecraft Communications
B02-104 Mass Deposition Measurements from 26-Kilowatt Electric Propulsion Space Experiment Flight
B02-105 Radiometric Analysis from the 26-Kilowatt Electric Propulsion Space Experiment Flight
B02-103 Solar Cell Degradation During the 26-Kilowatt Electric Propulsion Space Experiment Flight
B02-098 System Engineering, Design, Integration, and Qualification of Electric Propulsion Space Experiment

Space Systems

B02-153 Mass-Based Optimization of Thermal Management and Power Systems for Space Applications

Spacecraft Contamination/Sterilization

B02-105 Radiometric Analysis from the 26-Kilowatt Electric Propulsion Space Experiment Flight
B02-103 Solar Cell Degradation During the 26-Kilowatt Electric Propulsion Space Experiment Flight

Spacecraft Power

B02-064 Recent GRC Aerospace Technologies Applicable to Terrestrial Energy Systems

Spacecraft Propulsion System Integration

B02-037 Design Analysis of a Satellite Hydrazine Propulsion System
B02-099 Development and Flight Qualification of a 26-Kilowatt Arcjet Propulsion Subsystem
B02-102 On-Orbit Optical Observations of Electric Propulsion Space Experiment 26-Kilowatt Arcjet
B02-068 Project Orion and Future Prospects for Nuclear Pulse Propulsion
B02-105 Radiometric Analysis from the 26-Kilowatt Electric Propulsion Space Experiment Flight
B02-045 Sizing a Slingatron-Based Space Launcher
B02-098 System Engineering, Design, Integration, and Qualification of Electric Propulsion Space Experiment

Spacecraft Test and Evaluation

B02-099 Development and Flight Qualification of a 26-Kilowatt Arcjet Propulsion Subsystem

Spacecraft Thermal Management

B02-153 Mass-Based Optimization of Thermal Management and Power Systems for Space Applications

Structural Mechanics and Materials

Structural Dynamics and Characterization

B02-039 Temperature-Dependent Modal Test/Analysis Correlation of X-34 FASTRAC Composite Rocket Nozzle

Structural Finite Elements

B02-113 Thermomechanical Analysis and Optimization of Cryogenic Liquid Rocket Engines

Structural Optimization

B02-113 Thermomechanical Analysis and Optimization of Cryogenic Liquid Rocket Engines

Thermal Effects

B02-039 Temperature-Dependent Modal Test/Analysis Correlation of X-34 FASTRAC Composite Rocket Nozzle

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition, and Degradation

B02-141 Assessment of Combustion Characteristics and Mechanism of Hydroxylammonium Nitrate-Based Liquid Monopropellant
B02-081 Solid-Fuel Regression Rate Behavior of Vortex Hybrid Rocket Engines

Aerothermodynamics/Thermal Protection

B02-120 Analysis and Multidisciplinary Optimization of Internal Coolant Networks in Turbine Blades

Computational Heat Transfer

B02-120 Analysis and Multidisciplinary Optimization of Internal Coolant Networks in Turbine Blades

Laser Interaction

B02-150 Advanced Performance Modeling of Experimental Laser Lightcraft

Thermal Modeling and Analysis

B02-120 Analysis and Multidisciplinary Optimization of Internal Coolant Networks in Turbine Blades
B02-092 Experimental Study of a 3-kW Stirling Engine
B02-113 Thermomechanical Analysis and Optimization of Cryogenic Liquid Rocket Engines

Thermochemistry and Chemical Kinetics

B02-095 Combustion Characteristics of Ethylene in Scramjet Engines
B02-047 Ethylene Ignition and Detonation Chemistry, Part 1: Detailed Modeling and Experimental Comparison
B02-048 Ethylene Ignition and Detonation Chemistry, Part 2: Ignition Histories and Reduced Mechanisms
B02-023 Reduced Chemical Kinetic Mechanisms for Hydrocarbon Fuels

Chronological Index

B02-001 History of U.S. Navy Ramjet, Scramjet, and Mixed-Cycle Propulsion Development. P. J. Waltrup and M. E. White, *Johns Hopkins University*; F. Zarlingo, *U.S. Naval Air Warfare Center*; and E. S. Gravlin, *U.S. Naval Air Warfare Center* (**18**, 1, p. 14) SURVEY based on AIAA Paper 96-3152

B02-002 Integrated Design and Analysis of Intakes and Nozzles in Air-Breathing Engines. M. Ferlauto, F. Larocca, and L. Zannetti, *Politecnico di Torino, Italy* (**18**, 1, p. 28) Article

B02-003 Analytical Model of the Base Flow Between a Subsonic and Supersonic Flow. Doo S. Baik, *Kookmin University, Korea*; and Glen W. Zumwalt, *Wichita State University* (**18**, 1, p. 35) Article

B02-004 Numerical Simulation of the Ram Accelerator Using a New Chemical Kinetics Mechanism. Michael J. Nusca, *U.S. Army Research Laboratory* (**18**, 1, p. 44) Article

B02-005 Scale-Up Experiments on Liquid-Fueled Active Combustion Control. Ken H. Yu, *University of Maryland*; and Ken J. Wilson, *U.S. Naval Air Warfare Center* (**18**, 1, p. 53) Article based on AIAA Paper 98-3211

B02-006 Experimental Investigation of Limit-Cycle Oscillations in an Unstable Gas Turbine Combustor. Tim C. Lieuwen, *Georgia Institute of Technology* (**18**, 1, p. 61) Article

B02-007 Thermodynamic Cycle Analysis of Pulse Detonation Engines. William H. Heiser, *U.S. Air Force Academy*; and David T. Pratt, *University of Washington* (**18**, 1, p. 68) Article

B02-008 Fundamentals of Idealized Airbreathing Pulse-Detonation Engines. J. A. C. Kentfield, *University of Calgary, Canada* (**18**, 1, p. 77) Article based on AIAA Paper 2000-3469

B02-009 Selection of Actuators and Sensors for Surge Control. Marc van de Wal, Frank Willems, and Bram de Jager, *Eindhoven University of Technology, The Netherlands* (**18**, 1, p. 84) Article

B02-010 Flow Control via Rotor Trailing Edge Blowing in a Rotor/Stator Axial Compressor. A. M. Wo, A. C. Lo, and W. C. Chang, *National Taiwan University, Taiwan, ROC* (**18**, 1, p. 93) Article

B02-011 Active Control of Discrete-Frequency Noise Generated by Rotor-Stator Interactions. Scott Sawyer and Sanford Fleeter, *Purdue University*; and John Simonich, *United Technologies Research Center* (**18**, 1, p. 100) Article

B02-012 Shock Fitting a Transonic Cascade Solution into an Inverse Design Technique. Jeffrey W. Yokota and Adam J. Medd, *University of Alberta, Canada* (**18**, 1, p. 107) Article

B02-013 Experimental and Analytical Design Verification of the Dual-Bell Concept. Gerald Hagemann, Michael Terhardt, and Dietrich Haeseler, *Astrium GmbH, Germany*; and Manuel Frey, *DLR, German Aerospace Research Center, Germany* (**13**, 1, p. 116) Article based on AIAA Paper 2000-3778

B02-014 Effects of Grain Geometry on Pulse-Triggered Combustion Instability in Rocket Motors. Mehdi Golafshani, Mohammad Farshchi, and Hojat Ghassemi, *Sharif University of Technology, Iran* (**18**, 1, p. 123) Article

B02-015 Overview of the Development of Hydrazinium Nitroformate. H. F. R. Schöyer, *Schöyer Consultancy B.V., The Netherlands*; W. H. M. Welland-Veltmans, *Aerospace Propulsion Products, The Netherlands*; J. Louwers, *Royal Philips Electronics Optical Storage, The Netherlands*; and P. A. O. G. Korting, A. E. D. M. van der Heijden, H. L. J. Keizers, and R. P. van den Berg, *TNO-Prins Maurits Laboratorium, The Netherlands* (**18**, 1, p. 131) Article

B02-016 Overview of the Development of Hydrazinium Nitroformate-Based Propellants. H. F. R. Schöyer, *Schöyer Consultancy B.V., The Netherlands*; W. H. M. Welland-Veltmans, *Aerospace Propulsion Products, The Netherlands*; J. Louwers, *Royal Philips Electronics Optical Storage, The Netherlands*; and P. A. O. G. Korting, A. E. D. M. van der Heijden, H. L. J. Keizers, and R. P. van den Berg, *TNO-Prins Maurits Laboratorium, The Netherlands* (**18**, 1, p. 138) Article

B02-017 Design of a Fusion Propulsion System—Part 1: Gigawatt-Level Magnetoplasmadynamic Source. Pavlos G. Mikellides, *Ohio Aerospace Institute*; Peter J. Turchi, *Los Alamos National Laboratory*; and Ioannis G. Mikellides, *Science Applications International Corporation* (**18**, 1, p. 146) Article

B02-018 Design of a Fusion Propulsion System—Part 2: Numerical Simulation of Magnetic-Nozzle Flows. Ioannis G. Mikellides, *Science Applications International Corporation*; Pavlos G. Mikellides, *Ohio Aerospace Institute*; Peter J. Turchi and Thomas M. York, *The Ohio State University* (**18**, 1, p. 152) Article based on AIAA Paper 2000-3367

B02-019 Interior and Exterior Laser-Induced Flourescence and Plasma Measurements within a Hall Thruster. W. A. Hargus Jr., and M. A. Cappelli, *Stanford University* (**18**, 1, p. 159) Article

B02-020 Verification Tests of Carbon-Carbon Composite Grids for Microwave Discharge Ion Thruster. I. Funaki, H. Kuninaka, K. Toki, Y. Shimizu, and K. Nishiyama, *Institute of Space and Astronautical Science, Japan*; and Y. Horiuchi, *NEC Aerospace Systems, Ltd., Japan* (**18**, 1, p. 169) Article

B02-021 Cascade Arc Studies of Hydrogen/Nitrogen Plasmas in Nonequilibrium. Trevor Moeller, Dennis Keefer, and Robert Rhodes, *University of Tennessee Space Institute* (**18**, 1, p. 176) Article

B02-022 Flow Past Stationary Spherical Particles with Streamwise Velocity Fluctuation. A. Dasgupta, *Quest, Inc.*; and T. I-P. Shih, *Michigan State University* (**18**, 1, p. 184) Article

B02-023 Reduced Chemical Kinetic Mechanisms for Hydrocarbon Fuels. Christopher J. Montgomery and Marc A. Cremer, *Reaction Engineering International*; Jyh-Yuan Chen, *University of California*; Charles K. Westbrook, *Lawrence Livermore National Laboratory*; and Lourdes Q. Maurice, *U.S. Air Force Research Laboratory* (**18**, 1, p. 192) Article

B02-024 Two-Dimensional Spectroscopic Analysis of a Flame Using Highly Preheated Combustion Air. Noriyuki Konishi, Kuniyuki Kitagawa, and Norio Arai, *Nagoya University, Japan*; and Ashwani K. Gupta, *University of Maryland* (**18**, 1, p. 199) Article

B02-025 Anomalous Deflagration Behavior of Ammonium Perchlorate at Elevated Pressures. Satyanarayanan R. Chakravarthy, Edward W. Price, Robert K. Sigman, and Jeffrey M. Freeman, *Georgia Institute of Technology* (**18**, 1, p. 205) Technical Note

B02-026 Effects of GH_2/LOX Velocity and Momentum Ratios on Shear Coaxial Injector Atomization. M. Ferraro, R. J. Kujala, J.-L. Thomas, M.J. Glogowski, and M. M. Micci, *The Pennsylvania State University* (**18**, 1, p. 209) Technical Note

B02-027 Equation for Additive Drag Coefficient at Static Conditions. K. L. Christensen, *KC Consulting Engineering* (**18**, 1, p. 211) Technical Note

Technical Comment by William H. Heiser, *U.S. Air Force Academy*; and Jack D. Mattingly, *Seattle University* (**18**, 4, p. 967)

Reply (**18**, 4, p. 968)

B02-028 Intercusp Electron Transport in an NSTAR-Derivative Ion Thruster. John E. Foster, *NASA John H. Glenn Research Center at Lewis Field* (**18**, 1, p. 213) Technical Note

B02-029 Optimal Three-Dimensinal Nozzle Shape Design Using CFD and Parallel Simulated Annealing. X. Wang and M. Damodaran, *Nanyang Technological University, Singapore* (**18**, 1, p. 217) Technical Note

B02-030 Propagation of Acoustic Waves in a Two-Phase Vaporizing Mixture. Joël Dupays and François Vuillot, *ONERA, France* (**18**, 1, p. 222) Technical Note based on AIAA Paper 98-3696

B02-031 Multilevel Analysis of Pulsed Detonation Engines. Houshang B. Ebrahimi, *Sverdrup Technology, Inc.*; and Rajendran Mohanraj and Charles L. Merkle, *University of Tennessee* (**18**, 2, p. 225) Article

B02-032 Development of Advanced Industrial Furnace Using Highly Preheated Combustion Air. T. Hasegawa and S. Mochida, *Nippon Furnace Kogyo Kaisha Ltd., Japan*; and A. K. Gupta, *University of Maryland* (**18**, 2, p. 233) Article

B02-033 Effects of Liquid-Oxygen Post Biasing on SSME Injector Wall Compatibility. P. A. Strakey and D. G. Talley, *U.S. Air Force Research Laboratory*; and L. K. Tseng and K. I. Miner, *Boeing Rocketdyne Propulsion and Power* (**18**, 2, p. 240) Article

B02-034 Time- and Length Scales of Combustion in Liquid Rocket Thrust Chambers. B. Ivancic and W. Mayer, *DLR, German Aerospace Center, Germany* (**18**, 2, p. 247) Article based on AIAA Paper 99-2211

B02-035 Computations of Axisymmetric Plug-Nozzle Flowfields: Flow Structures and Thrust Performance. Takashi Ito, *University of Tokyo, Japan*; Kozo Fujii, *Institute of Space and Astronautical Science, Japan*; and A. Koich Hayashi, *Aoyama Gakuin University, Japan* (**18**, 2, p. 254) Article based on AIAA Paper 99-3211

B02-036 Numerical Simulation of Side Loads in an Ideal Truncated Nozzle. Sébastien Deck and Philippe Guillen, *ONERA, France* (**18**, 2, p. 261) Article

B02-037 Design Analysis of a Satellite Hydrazine Propulsion System. An-Shik Yang, *Da Yeh University, Taiwan, ROC*; and Tien-Chuan Kuo, *National Space Program Office, Taiwan, ROC* (**18**, 2, p. 270) Article

B02-038 Leak Fault Detection of Liquid Rocket Engine Based on Strong Tracking Filter. Yu Daren and Wang Jianbo, *Harbin Institute of Technology, ROC* (**18**, 2, p. 280) Article

B02-039 Temperature-Dependent Modal Test/Analysis Correlation of X-34 FASTRAC Composite Rocket Nozzle. Andrew M. Brown, *University of North Carolina at Charlotte* (**18**, 2, p. 284) Article based on AIAA Paper 2000-1741

B02-040 Characteristic Analysis of Flow-Induced Vibrations on Inducer of Oxygen Pump. Liang Hengli and Chen Zuoyi, *Tsinghua University, ROC* (**18**, 2, p. 289) Article

B02-041 Numerical Predictions of Channel Flows with Fluid Injection Using Reynolds-Stress Model. Bruno Chaouat, *ONERA, France* (**18**, 2, p. 295) Article

B02-042 Effect of Nozzle Cavity on Resonance in Large SRM: Theoretical Modeling. J. Anthoine and J-M. Buchlin, *von Kármán Institute for Fluid Dynamics, Belgium*; and A. Hirschberg, *Technische Universiteit Eindhoven, The Netherlands* (**18**, 2, p. 304) Article based on AIAA Paper 2001-2102

B02-043 Dynamic Combustion of Solid Propellants: Effects of Unsteady Condensed Phase Degradation Layer. K. R. Anil Kumar, *Indian Institute of Science, India*; and K. N. Lakshmisha, *Indian Institute of Science, India* (**18**, 2, p. 312) Article

B02-044 Slingatron: A High Velocity Rapid Fire Sling. Derek A. Tidman, *Advanced Launch Corporation* (**18**, 2, p. 322) Article

B02-045 Sizing a Slingatron-Based Space Launcher. Mark L. Bundy, *U.S. Army Research Laboratory*; Derek A. Tidman, *Advanced Launch Corporation*; and Gene R. Cooper, *U.S. Army Research Laboratory* (**18**, 2, p. 330) Article

B02-046 Numerical Simulations of the Slingatron. G. R. Cooper, *U.S. Army Research Laboratory*; D. A. Tidman, *Advanced Launch Corporation*; and M. L. Bundy, *U.S. Army Research Laboratory* (**18**, 2, p. 338) Article

B02-047 Ethylene Ignition and Detonation Chemistry, Part 1: Detailed Modeling and Experimental Comparison. B. Varatharajan and F. A. Williams, *University of California* (**18**, 2, p. 344) Article

B02-048 Ethylene Ignition and Detonation Chemistry, Part 2: Ignition Histories and Reduced Mechanisms. B. Varatharajan and F. A. Williams, *University of California* (**18**, 2, p. 352) Article

B02-049 Study of the High-Temperature Autoignition of *n*-Alkane/O_2/Ar Mixtures. D. C. Horning, D. F. Davidson, and R. K. Hanson, *Stanford University* (**18**, 2, p. 363) Article

B02-050 Profiling of Redox Index During Combustion to Monitor C/C Composite Degradation in Flames. Kuniyuki Kitagawa, Masao Kubota, and Norio Arai, *Nagoya University, Japan*; and Ashwani K. Gupta, *University of Maryland* (**18**, 2, p. 372) Article

B02-051 Chemiluminescence-Based Feedback Control of Equivalence Ratio for a Continuous Combustor. Douglas A. Scott, Galen B. King and Normand M. Laurendeau, *Purdue University* (**18**, 2, p. 376) Article

B02-052 Linear Deterministic Source Terms for Hot Streak Simulations. Paul D. Orkwis, *University of Cincinnati*; and Mark G. Turner and John W. Barter, *General Electric Aircraft Engines* (**18**, 2, p. 383) Article

B02-053 Combustion Instability Active Control Using Periodic Fuel Injection. J. P. Hathout, *Robert Bosch Corporation*; M. Fleifil, *John Zink Company*; and A. M. Annaswamy and A. F. Ghoniem, *Massachusetts Institute of Technology* (**18**, 2, p. 390) Article

B02-054 Constant Volume Limit of Pulsed Propulsion for a Constant γ Ideal Gas. Douglas G. Talley and Edward B. Coy, *U. S. Air Force Research Laboratory* (**18**, 2, p. 400) Article based on AIAA Paper 2000-3216

B02-055 Combustion Air Jet Influence on Primary Zone Characteristics for Gas-Turbine Combustors. S. Gogineni, *Systems Research Laboratories*; D. Shouse, C. Frayne, and J. Stutrud, *U.S. Air Force Research Laboratory*; and G. Sturgess, *Pratt & Whitney* (**18**, 2, p. 407) Article

B02-056 Mach 8 Testing of a Scramjet Engine with Ramp Compression. Takeshi Kanda, Kouichiro Tani, Kan Kobayashi, Toshihito Saito, and Tetsuji Sunami, *National Aerospace Laboratory, Japan* (**18**, 2, p. 417) Article

B02-057 Magnetohydrodynamic Power Extraction from Cold Hypersonic Airflows with External Ionizers. Sergey O. Macheret, Mikhail N. Shneider, and Richard B. Miles, *Princeton University* (**18**, 2, p. 424) Article based on AIAA Paper 99-4800

B02-058 Analysis of a High-Efficiency Low-Emissions "Chemical Gas Turbine" System. Takahisa Yamamoto, Tomohiko Furuhata, and Norio Arai, *Nagoya University, Japan*; and Noam Lior, *University of Pennsylvania* (**18**, 2, p. 432) Article

B02-059 Fuzzy Logic Intelligent System for Gas Turbine Module and System Fault Isolation. Ranjan Ganguli, *Indian Institute of Science, India* (**18**, 2, p. 440) Article

B02-060 Particle Image Velocimetry Characterization of a Chordwise Bending Cascade Flowfield. Daniel A. Ehrlich and Sanford Fleeter, *Purdue University* (**18**, 2, p. 448) Article

B02-061 Rotor Blade-to-Blade Wake Variability and Effect on Downstream Vane Response. Albert J. Sanders and Sanford Fleeter, *Purdue University* (**18**, 2, p. 456) Article

B02-062 Massively Parallel Simulation of the Unsteady Flow in an Axial Turbine Stage . Jixian Yao, *Stanford University*; Roger L. Davis, *United Technologies Research Center*; and Juan J. Alonso and Antony Jameson, *Stanford University* (**18**, 2, p. 465) Article

B02-063 Impeller Blade Unsteady Aerodynamic Response to Vaned Diffuser Potential Fields. Dana Gottfried and Sanford Fleeter, *Purdue University* (**18**, 2, p. 472) Article

B02-064 Recent GRC Aerospace Technologies Applicable to Terrestrial Energy Systems. M. David Kankam, Valerie J. Lyons, Mark A. Hoberecht, Robert R. Tacina, and Aloysius F. Hepp, *NASA John H. Glenn Research Center at Lewis Field* (**18**, 2, p. 481) Article

B02-065 Correlating Laser Induced Fluorescence and Molecular Beam Mass Spectrometry Ion Energy Distributions. George J. Williams, Timothy B. Smith, Frank S. Gulczinski, and Alec D. Gallimore, *University of Michigan* (**18**, 2, p. 489) Technical Note

B02-066 Transonic Rotor Blade Pressure Measurement Using Flourescent Paints. T. Liu, *NASA Langley Research Center*; S. Torgerson, *LM Aero*; J. Sullivan, *Purdure University*; R. Johnston, *Pratt & Whitney*; and S. Fleeter, *Purdue University* (**18**, 2, p. 491) Technical Note

B02-067 Unsteady Flow in a Supersonic Turbine with Variable Specific Heats. Daniel J. Dorney and Lisa W. Griffin, *NASA Marshall Space Flight Center*; Frank Huber, *Riverbend Design Services*; and Douglas L. Sondak, *Boston University* (**18**, 2, p. 493) Technical Note

B02-068 Project Orion and Future Prospects for Nuclear Pulse Propulsion. G. R. Schmidt, J. A. Bonometti, and C. A. Irvine, *NASA Marshall Space Flight Center* (**18**, 3, p. 497) Article based on AIAA Paper 2000-3865

B02-069 Study of the Phase-Lock Phenomenon for a Circular Slingatron. G. R. Cooper, *U.S. Army Research Laboratory*; and D. A. Tidman, *AL Corporation* (**18**, 3, p. 505) Article

B02-070 Shape Optimization of Supersonic Turbines Using Global Approximation Methods. Nilay Papila and Wei Shyy, *University of Florida*; and Lisa Griffin and Daniel J. Dorney, *NASA Marshall Flight Center* (**18**, 3, p. 509) Article based on AIAA Paper 2001-1065

B02-071 Unsteady Cascade Aerodynamics in the Time Domain. Dana A. Gottfried and Sanford Fleeter, *Purdue University* (**18**, 3, p. 519) Article

B02-072 Multiobjective Optimization of Rocket Engine Pumps Using Evolutionary Algorithm. Akira Oyama and Meng-Sing Liou, *NASA John H. Glenn Research Center at Lewis Field* (**18**, 3, p. 528) Article

B02-073 Three-Dimensional Hybrid Mesh Generation for Turbomachinery Airfoils. Kyu-sup Kim and Paul G. A. Cizmas, *Texas A&M University* (**18**, 3, p. 536) Article based on AIAA Paper 2001-3209

B02-074 Development of High-Performance Airfoils for Axial Flow Compressors Using Evolutionary Computation. Ernesto Benini and Andrea Toffolo, *University of Padova, Italy* (**18**, 3, p. 544) Article

B02-075 High-Pressure Steam Flow in Turbine Bypass Valve System Part 1: Valve Flow. R. S. Amano and G. R. Draxler, *University of Wisconsin-Milwaukee* (**18**, 3, p. 555) Article

B02-076 High-Pressure Steam Flow in Turbine Bypass Valve System Part 2: Pipe Flow. R. S. Amano, G. R. Draxler, and J. M. Golembiewski, *University of Wisconsin-Milwaukee* (**18**, 3, p. 561) Article

B02-077 Acceptance Screening of Turbopump Gears Using the Cepstrum Method. S. J. DiMaggio, *The Aerospace Corporation* (**18**, 3, p. 572) Article

B02-078 Appearance of Restricted Shock Separation in Rocket Nozzles. G. Hagemann, *Astrium GmbH, Germany*; and M. Frey and W. Koschel, *DLR, German Aerospace Center, Germany* (**18**, 3, p. 577) Article

B02-079 Performance Analysis of Secondary Gas Injection into a Conical Rocket Nozzle. Hyun Ko and Woong-Sup Yoon, *Yonsei University, Korea* (**18**, 3, p. 585) Article

B02-080 Ejector Primary Flow Molecular Weight Effects in an Ejector-Ram Rocket Engine. Sam Han, John Peddieson, Jr., and David Gregory, *Tennessee Technological University* (**18**, 3, p. 592) Article

B02-081 Solid-Fuel Regression Rate Behavior of Vortex Hybrid Rocket Engines. William H. Knuth, Martin J. Chiaverini, J. Arthur Sauer, and Daniel J. Gramer, *Orbital Technologies Corporation* (**18**, 3, p. 600) Article based on AIAA Paper 99-2318

B02-082 Combustion of Liquefying Hybrid Propellants: Part 1, General Theory. M. A. Karabeyoglu, D. Altman, and B. J. Cantwell, *Stanford University* (**18**, 3, p. 610) Article

B02-083 Combustion of Liquefying Hybrid Propellants: Part 2, Stability of Liquid Films. M. A. Karabeyoglu and B. J. Cantwell, *Stanford University* (**18**, 3, p. 621) Article

B02-084 Burning Aluminum Particles Inside a Laboratory-Scale Solid Rocket Motor. John C. Melcher, Herman Krier, and Rodney L. Burton, *University of Illinois at Urbana-Champaign* (**18**, 3, p. 631) Article

B02-085 Evaluation of Ultrasound Technique for Solid-Propellant Burning-Rate Response Measurements. Jeffrey J. Murphy and Herman Krier, *University of Illinois at Urbana-Champaign* (**18**, 3, p. 641) Article

B02-086 Aerodynamic Optimization of Turbomachinery Cascades Using Euler/Boundary-Layer Coupled Genetic Algorithms. Ozhan Oksuz, I. Sinan Akmandor, and Mehmet S. Kavsaoglu, *Middle East Technical University, Turkey* (**18**, 3, p. 652) Article based on AIAA Paper 2001-2597

B02-087 When Do Open-Loop Strategies for Combustion Control Work? R. K. Prasanth, *Scientific Systems, Inc.*; A. M. Annaswamy, *Massachusetts Institute of Technolgy*; J. P. Hathout, *Robert Bosch Corporation*; and A. F. Ghoniem, *Massachusetts Institute of Technolgy* (**18**, 3, p. 658) Article

B02-088 Flashover: A Study of Parameter Effects on the Time to Reach Flashover Conditions. Hyeong-Jin Kim and David G. Lilley, *Lilley and Associates* (**18**, 3, p. 669) Article

B02-089 Comparison of Criteria for Room Flashover. Hyeong-Jin Kim and David G. Lilley, *Lilley and Associates* (**18**, 3, p. 674) Article based on AIAA Paper 99-0343

B02-090 Effects of Airstream Mach Number on H_2/N_2 Plasma Igniter. Goro Masuya, Kenichi Takita, Katsuyoshi Takahashi, Fumio Takatori, and Hiroyuki Ohzehi, *Tohoku University, Japan* (**18**, 3, p. 679) Article based on AIAA Paper 2001-0520

B02-091 Elliptic Coflow Effects on a Circular Gas Jet Flame. Ahsan R. Choudhuri, Sayela P. Luna, and S. R. Gollahalli, *University of Oklahoma* (**18**, 3, p. 686) Article based on AIAA Paper 2001-0977

B02-092 Experimental Study of a 3-kW Stirling Engine. Noboru Kagawa, *National Defense Academy, Japan* (**18**, 3, p. 696) Article

B02-093 Improved Mean-Flow Solution for Slab Rocket Motors with Regressing Walls. Chong Zhou and Joseph Majdalani, *Marquette University* (**18**, 3, p. 703) Article based on AIAA Paper 2000-3191

B02-094 Geometric Evaluation of Axisymmetric Thrust-Vectoring Nozzles for Aerodynamic Performance Predictions. Erich A. Wilson, Dan Adler, and Pinhas Z. Bar-Yoseph, *Technion-Israel Institute of Technology, Israel* (**18**, 3, p. 712) Technical Note

B02-095 Combustion Characteristics of Ethylene in Scramjet Engines. A. A. Taha, S. N. Tiwari, and T. O. Mohieldin, *Old Dominion University* (**18**, 3, p. 716) Technical Note

B02-096 High-Intensity Sound Absorption at an Orifice with Bias Flow. Xiaodong Jing and Xiaofeng Sun, *Beijing University of Aeronautics and Astronautics, China* (**18**, 3, p. 718) Technical Note

B02-097 Review of the Electric Propulsion Space Experiment (ESEX) Program. D. R. Bromaghim, J. R. LeDuc, R. M. Salasovich, G. G. Spanjers, and J. M. Fife, *U.S. Air Force Research Laboratory*; M. J. Dulligan, *ERC, Inc.*; J. H. Schilling and D. C. White, *Sparta, Inc.*; and L. K. Johnson, *The Aerosapce Corporation* (**18**, 4, p. 723) Article

B02-098 System Engineering, Design, Integration, and Qualification of Electric Propulsion Space Experiment . Mary M. Kriebel, *TRW* (**18**, 4, p. 731) Article

B02-099 Development and Flight Qualification of a 26-Kilowatt Arcjet Propulsion Subsystem. R. J. Cassady, W. A. Hoskins, and C. E. Vaughan, *General Dynamics Corporation* (**18**, 4, p. 740) Article

B02-100 Orbital Performance Measurements of Air Force Electric Propulsion Space Experiment Ammonia Arcjet. J. M. Fife and D. R. Bromaghim, *Air Force Research Laboratory*; D. A. Chart, *General Dynamics, Inc.*; W. A. Hoskins and C. E. Vaughan, *General Dynamics, Inc.*; and L. K. Johnson, *The Aerospace Corporation* (**18**, 4, p. 749) Article

B02-101 Effect of ESEX 26-kW Arcjet Operation on Spacecraft Communications. M. J. Dulligan, *ERC, Inc.*; D. R. Bromaghim, J. A. Zimmerman and R. M. Salasovich, *U.S. Air Force Research Laboratory*; D. Hardesty, *Lockheed Martin Technical Operations*; and L. K. Johnson, *The Aerospace Corporation* (**18**, 4, p. 754) Article

B02-102 On-Orbit Optical Observations of Electric Propulsion Space Experiment 26-Kilowatt Arcjet. L. K. Johnson, *The Aerospace Corporation*; G. G. Spanjers and D. R. Bromaghim, *U.S. Air Force Research Laboratory*; M. W. Dulligan, *ERC, Inc.*; and W. A. Hoskins, *General Dynamics Corporation* (**18**, 4, p. 763) Article

B02-103 Solar Cell Degradation During the 26-Kilowatt Electric Propulsion Space Experiment Flight. J. H. Schilling, *Sparta, Inc.*; G. G. Spanjers and D. R. Bromaghim, *U.S. Air Force Research Laboratory*; and L. K. Johnson, *The Aerospace Corporation* (**18**, 4, p. 768) Article

B02-104 Mass Deposition Measurements from 26-Kilowatt Electric Propulsion Space Experiment Flight. G. G. Spanjers, *U.S. Air Force Research Laboratory*; J. H. Schilling, *Sparta, Inc.*; S. F. Engelman, *ERC, Inc.*; D. R. Bromaghim, *U.S. Air Force Research Laboratory*; and L. K. Johnson, *The Aerospace Corporation* (**18**, 4, p. 772) Article

B02-105 Radiometric Analysis from the 26-Kilowatt Electric Propulsion Space Experiment Flight. G. G. Spanjers, *U.S. Air Force Research Laboratory*; J. H. Schilling, *Sparta, Inc.*; D. R. Bromaghim, *U.S. Air Force Research Laboratory*; and L. K. Johnson, *The Aerospace Corporation* (**18**, 4, p. 777) Article

B02-106 Observations of Soot in the Combustion of Methanol/Toluene Spray Flames. C. T. Avedisian, *Cornell University*; C. Presser, *National Institute of Standards and Technology*; and A. K. Gupta, *University of Maryland* (**18**, 4, p. 781) Article

B02-107 Computational-Fluid-Dynamics Investigation of Aeromechanics. Peter D. Silkowski, *United Technologies Research Center*; Chae M. Rhie, *Pratt & Whitney*; George S. Copeland, *United Technologies Research Center*; and James A. Eley and James M. Bleeg, *Pratt & Whitney* (**18**, 4, p. 788) Article

B02-108 Facility Effects on Performance Measurements of Micropropulsion Systems that Utilize Gas Expansion. Andrew D. Ketsdever, *U.S. Air Force Research Laboratory* (**18**, 4, p. 797) Article based on AIAA Paper 2001-3335

B02-109 Sensitivity of Solid Rocket Motors to Electrostatic Discharge: History and Future. Alain Davenas and Roger Rat, *SNPE, France* (**18**, 4, p. 805) Article based on AIAA Paper 99-2930

B02-110 Asphaltic Thermoplastic Propellants. John J. Rusek, *Purdue University* (**18**, 4, p. 810) Article

B02-111 Model of Aluminum Agglomerate Evolution in Combustion Products of Solid Rocket Propellant. V. A. Babuk and V. A. Vasilyev, *Baltic State Technical University, Russia* (**18**, 4, p. 814) Article

B02-112 Chemical Speciation and Dynamics in the Surface Combustion Zone of Energetic Materials. Thomas B. Brill, *University of Delaware*; Merrill C. Beckstead, *Brigham Young University*; Joseph E. Flanagan; M. C. Lin, *Emory University*; Thomas A. Litzinger, *Pennsylvania State University*; R. H. Woodward Waesche; and Charles A. Wight, *University of Utah* (**18**, 4, p. 824) Article

B02-113 Thermomechanical Analysis and Optimization of Cryogenic Liquid Rocket Engines. Detlef Kuhl, *Ruhr-University Bochum, Germany*; and Jörg Riccius and Oskar J. Haidn, *DLR, German Aerospace Research Center, Germany* (**18**, 4, p. 835) Article

B02-114 Effect of Momentum Ratio on the Mixing Performance of Unlike Split Triplet Injectors. Y. D. Won, Y. H. Cho, S. W. Lee, and W. S. Yoon, *Yonsei University, Korea* (**18**, 4, p. 847) Article

B02-115 Flourescence and Temperature Measurements in an Actively Forced Swirl-Stabilized Spray Combustor. V. Santhanam, F. C. Knopf, S. Acharya, and E. Gutmark, *Louisiana State University* (**18**, 4, p. 855) Article

B02-116 Heat Release Rates of Burning Items in Fires. Hyeong-Jin Kim and David G. Lilley, *Lilley and Associates* (**18**, 4, p. 866) Article based on AIAA Paper 2000-0722

B02-117 New Fossil Power Systems and the Role of Open-Cycle Magnetohydrodynamics Generators. Naoyuki Kayukawa, *Hokkaido University, Japan* (**18**, 4, p. 871) Article

B02-118 Application of Autoassociative Neural Network on Gas-Path Sensor Data Validation. Pong-Jeu Lu and Tzu-Cheng Hsu, *National Cheng Kung University, Taiwan, ROC* (**18**, 4, p. 879) Article

B02-119 Control of Low-Pressure Turbine Separation Using Vortex-Generator Jets. Rolf Sondergaard and Richard B. Rivir, *U.S. Air Force Research Laboratory*; and Jeffrey P. Bons, *Air Force Institute of Technology* (**18**, 4, p. 889) Article

B02-120 Analysis and Multidisciplinary Optimization of Internal Coolant Networks in Turbine Blades. Thomas J. Martin, *Pratt and Whitney Engine Company*; and George S. Dulikravich, *University of Texas at Arlington* (**18**, 4, p. 896) Article

B02-121 Optimum Mixing of Core and Bypass Streams in a High-Bypass Civil Turbofan. Vivek Sanghi and B. K. Lakshmanan, *Gas Turbine Research Establishment, India*; and S. K. Sane, *Indian Institute of Technology, India* (**18**, 4, p. 907) Article based on AIAA Paper 2001-3618

B02-122 Automated Design Optimization of a Three-Dimensional S-Shaped Subsonic Diffuser. Sophia Lefantzi and Doyle D. Knight, *Rutgers University* (**18**, 4, p. 913) Article

B02-123 Inlet/Compressor System Response to Short-Duration Acoustic Disturbances. Anthony B. Opalski and Miklos Sajben, *University of Cincinnati* (**18**, 4, p. 922) Article based on AIAA Paper 2001-3885

B02-124 Analysis of a Fusion-Electric Airbreathing Earth to Orbit Launch Vehicle. Robert B. Adams, *International Space Systems, Inc.*; and D. Brian Landrum, *University of Alabama in Huntsville* (**18**, 4, p. 933) Article

B02-125 Characterization of Expansion Tube Flows for Hypervelocity Combustion Studies. Adela Ben-Yakar and Ronald K. Hanson, *Stanford University* (**18**, 4, p. 943) Article

B02-126 Drag and Total Pressure Distributions in Scramjet Engines at Mach 8 Flight. Tohru Mitani and Tetsuo Hiraiwa, *National Aerospace Laboratory, Japan*; and Yuichi Tarukawa and Goro Masuya, *Tohoku University, Japan* (**18**, 4, p. 953) Article

B02-127 Laser-Air Interactions in an Internal Supersonic Flowpath. Robert B. Adams, *International Space Systems, Inc.*; and D. Brian Landrum, *University of Alabama in Huntsville* (**18**, 4, p. 961) Technical Note

B02-128 Timescaling Control Volumes During Real Time Digital Simulation of a Military Turbofans. Vivek Sanghi and B. K. Lakshmanan, *Gas Turbine Research Establishment, India* (**18**, 4, p. 964) Technical Note

B02-129 A PIV Investigation of Rotor-IGV Interactions in a Transonic Compressor. Albert J. Sanders, John Papalia, and Sanford Fleeter, *Purdue University* (**18**, 5, p. 969) Article

B02-130 Turbomachine Blade Row Interaction Predictions with a Three-Dimensional Finite Element Method. Dana A. Gottfried and Sanford Fleeter, *Purdue University* (**18**, 5, p. 978) Article

B02-131 Analysis of Dual-Mode Hydrocarbon Scramjet Operation at Mach 4-6.5. R. A. Baurle and D. R. Eklund, *Taitech, Inc.* (**18**, 5, p. 990) Article based on AIAA Paper 2001-3299

B02-132 Acoustic Flutter Control of Three-Dimensional Transonic Rotor Flow. Pong-Jeu Lu, Dartzi Pan, and Yi-Di Yu, *National Cheng Kung University, Taiwan, ROC* (**18**, 5, p. 1003) Article

B02-133 High-Speed Centrifugal Compressor Surge Initiation Characterization. William C. Oakes and Patrick B. Lawless, *Purdue University*; John R. Fagan, *Light Engineering*; and Sanford Fleeter, *Purdue University* (**18**, 5, p. 1012) Article

B02-134 Gas Turbine Engine and Sensor Fault Diagnosis Using Optimization Techniques. Marco Zedda, *Rolls-Royce, England, UK*; and Riti Singh, *Cranfield University, England, UK* (**18**, 5, p. 1019) Article

B02-135 Effect of Integration of Scramjet into Airframe on Engine Performance and Payload. Daisuke Akihisa, *Tohoku University, Japan*; Takeshi Kanda, Kouichiro Tani, and Kenji Kudo, *National Aerospace Laboratory of Japan, Japan*; and Goro Masuya, *Tohoku University, Japan* (**18**, 5, p. 1026) Article based on AIAA Paper 2000-0619

B02-136 Direct Experimental Impulse Measurements for Detonations and Deflagrations. M. Cooper, S. Jackson, J. Austin, E. Wintenberger, and J. E. Shepherd, *California Institute of Technology* (**18**, 5, p. 1033) Article

B02-137 Numerical Simulation of a Pulse Detonation Engine with Hydrogen Fuels. Houshang B. Ebrahimi, *Arnold Engineering Development Center*; and Charles L. Merkle, *University of Tennessee Space Institute* (**18**, 5, p. 1042) Article

B02-138 Influence of Radical Concentration and Fuel Decomposition on Ignition of Propane/Air Mixture. Yuriy Ya. Buriko, Viacheslav A. Vinogradov, and Valentin F. Goltsev, *Central Institute of Aviation Motors, Russia*; and Paul J. Waltrup, *Johns Hopkins University* (**18**, 5, p. 1049) Article based on AIAA Paper 2001-3958

B02-139 Effects of Halons and Halon Replacements on Hydrogen-Fueled Laminar Premixed Flames. C. H. Kim, O. C. Kwon, and G. M. Faeth, *University of Michigan* (**18**, 5, p. 1059) Article

B02-140 Pilot Flame Effects on Gas Jet Flames in Crossflow. Sien-Fong Goh and S. R. Gollahalli, *University of Oklahoma* (**18**, 5, p. 1068) Article based on AIAA Paper 2000-0592

B02-141 Assessment of Combustion Characteristics and Mechanism of Hydroxylammonium Nitrate-Based Liquid Monopropellant. Yi-Ping Chang and Kenneth K. Kuo, *Pennsylvania State University* (**18**, 5, p. 1076) Article based on AIAA Paper 2001-3272

B02-142 Nonlinear Heterogeneous Model of Composite Solid-Propellant Combustion. B. Rasmussen and R. A. Frederick Jr., *University of Alabama in Huntsville* (**18**, 5, p. 1086) Article based on AIAA Paper 99-2228

B02-143 Combustion Response of Ammonium Perchlorate Composite Propellants. Michael Shusser and Fred E. C. Culick, *California Institute of Technology*; and Norman S. Cohen, *Cohen Professional Services* (**18**, 5, p. 1093) Article

B02-144 Property Transformation of Thermotropic Liquid Crystals Polymers. J. J. Rusek, *Purdue University*; and K. P. Chaffee, *Air Force Research Laboratory* (**18**, 5, p. 1101) Article

B02-145 High Strain-Rate Constitutive Models for Solid Rocket Propellants. Sook-Ying Ho, *Defence Science and Technology Organisation, Australia* (**18**, 5, p. 1106) Article

B02-146 Study of Flow Separation in Truncated Ideal Contour Nozzle. S. B. Verma, *DLR Lampoldshausen, Germany* (**18**, 5, p. 1112) Article

B02-147 Experimental Investigation of End-Wall Flow in Turbine Rotor. X. Xiao and B. Lakshminarayana, *Pennsylvania State University* (**18**, 5, p. 1122) Technical Note

B02-148 Effect of Transient Gasdynamic Processes on the Impulse of Pulse Detonation Engines. C. B. Kiyanda, V. Tanguay, A. J. Higgins, and J. H. S. Lee, *McGill University, Canada* (**18**, 5, p. 1124) Technical Note

B02-149 Supersonic Wave/Blade-Row Interactions Establish Boundary Conditions for Unsteady Inlet Flows. Miklos Sajben, *University of Cincinnati* (**18**, 5, p. 1126) Technical Note

B02-150 Advanced Performance Modeling of Experimental Laser Lightcraft. Ten-See Wang, *NASA Marshall Space Flight Center*; Yen-Sen Chen and Jiwen Liu, *Engineering Sciences, Inc.*; Leik N. Myrabo, *Rensselaer Polytechnic Institute*; and Franklin B. Mead Jr., *U.S. Air Force Researcch Laboratory* (**18**, 6, p. 1129) Article

B02-151 Analysis and Application of Chorochronic Periodicity in Turbomachinery Rotor/Stator Interaction Computations. G. A. Gerolymos, G. J. Michon, and J. Neubauer, *Université Pierre-et-Marie-Curie, France* (**18**, 6, p. 1139) Article

B02-152 Experimental Study of the Transient Underexpanded Jet Generated by Electrothermal Capillary Plasma. Jong-Uk Kim, N. T. Clemens, and P. L. Varghese, *University of Texas at Austin* (**18**, 6, p. 1153) Article

B02-153 Mass-Based Optimization of Thermal Management and Power Systems for Space Applications. K. D. Freudenberg, W. E. Lear, and S. A. Sherif, *University of Florida*; and E. L. Golliher, *NASA John H. Glenn Research Center* (**18**, 6, p. 1161) Article

B02-154 Thermodynamics of Airbreathing Pulse-Detonation Engines. J. A. C. Kentfield, *University of Calgary, Alberta, Canada* (**18**, 6, p. 1170) Article

B02-155 Thermodynamic Limits of Work and Pressure Gain in Combustion and Evaporation Processes. M. Razi Nalim, *Indiana University-Purdue University Indianapolis* (**18**, 6, p. 1176) Article

B02-156 Work Potential Perspective of Engine Component Performance. Bryce Roth, *Georgia Institute of Technology* (**18**, 6, p. 1183) Article

B02-157 Numerical Reconstruction of Ejector Rocket Experimental Tests. A. Matesanz and A. Velazquez, *SENER Ingeniería y Sistemas S.A., Spain*; and J. Tizon and J. Montanes, *Universidad Politécnica de Madrid, Spain* (**18**, 6, p. 1191) Article

B02-158 Motor and Plume Particle Size Prediction in Solid-Propellant Rocket Motors. Oleg B. Kovalev, *Russian Academy of Sciences, Russia* (**18**, 6, p. 1199) Article

B02-159 Casting Process Impact on Small-Scale Solid Rocket Motor Ballistic Performance. P. Le Breton and D. Ribéreau, *SNPE Propulsion, France* (**18**, 6, p. 1211) Article

B02-160 Comparison of Laser- and Pressure-Driven Thrust Response of HMX. Gautam N. Kudva and Thomas A. Litzinger, *Pennsylvania State University* (**18**, 6, p. 1218) Article

B02-161 Modeling Cavitating Venturi Flows. Changhai Xu and Stephen D. Heister, *Purdue University*; and Robert Field, *NASA Stennis Space Center* (**18**, 6, p. 1227) Article

B02-162 Hydrogen Peroxide Decomposition on Various Supported Catalysts Effect of Stabilizers. Laurence Pirault-Roy, Charles Kappenstein, Maurice Guérin, and Rachel Eloirdi, *Université de Poitiers et Centre National de la Recherche Scientifique, France*; and Nicolas Pillet, *Centre National d'Etudes Spatiales, France* (**18**, 6, p. 1235) Article

B02-163 Thermochemistry of Species Produced from Monomethylhydrazine in Propulsion and Space-Related Applications. Laurent Catoire, *Centre National de la Recherche Scientifique and University of Orleans, France*; and Mark T. Swihart, *State University of New York at Buffalo* (**18**, 6, p. 1242) Article

B02-164 Advanced Seals for Industrial Turbine Applications: Design Approach and Static Seal Development. Mahmut F. Aksit, *Gebze Institute of Technology, Turkey*; Raymond E. Chupp and O. Saim Dinc, *General Electric Global Research Center*; and Mehmet Demiroglu, *Rensselaer Polytechnic Institute* (**18**, 6, p. 1254) Article

B02-165 Advanced Seals for Industrial Turbine Applications: Dynamic Seal Development. Raymond E. Chupp, Farshad Ghasripoor, and Norman A. Turnquist, *General Electric Global Research Center*; Mehmet Demiroglu, *Rensselaer Polytechnic Institute*; and Mahmut F. Aksit, *Gebze Institute of Technology, Turkey* (**18**, 6, p. 1260) Article

B02-166 Measured Flow Oscillations and Instabilities in Labyrinth Seal Cavities. David L. Rhode and J. Wayne Johnson, *Texas A&M University* (**18**, 6, p. 1267) Article

B02-167 Effects of Blade Count on Linearized and Nolinear Hot Streak Clocking Simulations. Douglas L. Sondak, *Boston University*; Vipul Gupta and Paul D. Orkwis, *University of Cincinnati*; and Daniel J. Dorney, *NASA Marshall Space Flight Center* (**18**, 6, p. 1273) Article

B02-168 Airfoil Row/Wake Interactions in a High-Speed Axial Compressor. Robert T. Johnston and Sanford Fleeter, *Purdue University* (**18**, 6, p. 1280)

B02-169 Interaction of Decaying Freestream Turbulence with a Moving Shock Wave: Pressure Field. S. Xanthos, G. Briassulis, and Y. Andreopoulos, *City College of the City University of New York* (**18**, 6, p. 1289) Article

B02-170 Proportional Control of Combustion Instabilities in a Simulated Gas-Turbine Combustor. Christian Oliver Paschereit, *Alstom (Switzerland) Ltd., Switzerland*; and Ephraim Gutmark, *University of Cincinnati* (**18**, 6, p. 1298) Article

B02-171 Effects of End Wall Geometry and Stacking on Supersonic Turbine Performance. Daniel J. Dorney and Lisa W. Griffin, *NASA Marshall Space Flight Center*; Frank W. Huber, *Riverbend Design Services*; and Douglas L. Sondak, *Boston University* (**18**, 6, p. 1305) Technical Note

B02-172 Controlling Electron Backstreaming Phenomena Through the Use of a Transverse Magnetic Field. John E. Foster and Michael J. Patterson, *NASA John H. Glenn Research Center at Lewis Field* (**18**, 6, p. 1308) Technical Note
